Connor Frugoli
Testing Report

       I am having some trouble actually getting sound. I think all of my functions work properly (though I have absolutely no way of knowing this for sure) but I simply cannot get any sound. I am getting this error message any time I try to play MIDI through my webpage:

Uncaught TypeError: value.match is not a function
   at Utilities.getNoteDetails (webmidi.iife.js:2105:29)
   at set identifier (webmidi.iife.js:1851:35)
   at new Note (webmidi.iife.js:1838:25)
   at Object.transpose (MidiEffects.js:75:26)
   at InputChannel.<anonymous> (script.js:117:19)
   at webmidi.iife.js:334:42
   at Array.forEach (<anonymous>)
   at InputChannel.emit (webmidi.iife.js:328:17)
   at InputChannel._parseEventForStandardMessages (webmidi.iife.js:8705:12)
   at InputChannel._processMidiMessageEvent (webmidi.iife.js:6670:12)

Because this is an issue with WebMidi, I have absolutely no idea how to fix it. I have tried to ask ChatGPT, I have tried moving things around in my code, but nothing is working.

Other than that, I think it will be just fine. Once I get over this roadblock I think my project will be finished.
